Azul y Garanza  
BODEGAS

Low-production vineyards located in the influence area of the Desert of Bardenas Reales of Navarra (the biggest desert of Europe) and in the Pre-Pyrenees. The very poor and arid clay-calcareous soil, the dry weather and the big contrast of temperature between the day and the night provide grapes with high concentration and a perfect balance.

Vineyards of Biodiversity

Azul y Garanza is now a more complete and exciting viniculture experience with the addition of new enriching varieties, soils, climates, collaborators and wines. Wild-natured vines, full of biodiversity and astonishingly beautiful; organic and endowed with special faculties which result in one-of-a-kind wines. Wines which are a clear reflection of the place they come from”

## 2017

RAINFALL: 350 l/m<sup>2</sup>  
FERTILIZER: No  
TREATMENTS: Sulphur (minimum dose)  
PRODUCTION: 5,000 kg/Ha  
OBSERVATIONS: High temperature and no rain during the vegetative process advanced the harvest resulting in grapes healthy and very aromatic skin. The lack of water during summer has concentrated the fruit resulting in a great balance between the degree and acidity.
